Contents

Foreword	4
Introduction	5
The experiment: background information	6
■ The origin of the regional road safety program	6
■ The partners in the program	7
The group of DTTs (<i>Directeurs des transports terrestres</i> - Land Transport Directors)	7
Sources of funds	8
Technical and scientific expertise	8
■ Principles and modalities of action	9
Favouring reproducible pilot actions	9
Giving priority to local initiatives	9
Strengthening and developing local capabilities	9
Evaluating the actions	9
Pilot actions and fundamental lessons	10
■ National co-operation among the players	11
A global approach associated with co-operation	11
A participatory approach based on national co-operation	11
■ Accident statistics	13
■ The educational continuum in Senegal	15
Accident prevention and educating the young	15
Driver training and evaluation	15
■ Developing a network of African experts	18
The steps in defining and implementing a road safety policy	19
■ Step 1: a complete diagnosis	19
■ Step 2: initiate, then formalise co-operation	20
■ Step 3: information systems	22
The objective analysis of the situation	22
Qualitative analyses essential to understanding and interpreting the statistical analyses	22
Access to the information base	22
Awareness, motivation, training: a permanent concern at each stage...	22
A few measures for the long-term survival of the tool	23
Accident black spots: the difficulties of locating the scene	23
■ Step 4: building a coherent national plan	23
Establish specific working groups	23
Assign and active role to the national partners	24
■ Step 5: implementing the actions	24
■ Step 6: evaluate, adjust	24
■ At each step: training and qualification are decisive	25
Conclusions and prospects : <i>Emphasis must be placed on training, accumulating data and gaining experiences</i>	26
■ Appendix 1: BAAC form, portrait format	27
■ Appendix 2: Summary sheet, Senegal	29
■ Appendix 3: Isted - context and modalities of action	30
■ List of acronyms	31
